SUBJECT: BLUE LANTERN LEVEL 3: POST-SHIPMENT END-USE CHECK
ON THE EXPORT OF U.S. DEFENSE ARTICLES CITING THE CANADIAN
EXEMPTION

REF: 2006 BLUE LANTERN GUIDEBOOK

[¶1](#). This is an Action Request. See paragraphs 2-4.

[¶2](#). The Department's Office of Defense Trade Controls Compliance (PM/DTCC) requests Embassy's assistance in conducting a post-shipment check on a transaction citing the Canadian exemption for the export of accelerometers to Canada. Embassy is requested to complete this Blue Lantern check within 45 days. Lack of response to a Blue Lantern check will affect pending and future licenses involving parties to this license.

[¶3](#). Reason for request: Under ITAR 126.5 (Canadian Exemption), certain United States Munitions List (USML) items may be exported to Canada without a license. Some items on USML Category VII - which includes accelerometers - may be subject to Missile Technology Control Regime (MTCR) restrictions and may require a license depending on commodity specification and type. DDTC requests this check based on vague description of commodity and end-use in export filing.

[¶4](#). ACTION OTTAWA: Mission Canada is requested to make inquiries with appropriate General Dynamics Land System - Canada (GDLS) officials to obtain all relevant details regarding the export of accelerometers to Canada citing the Canadian exemption, including exact commodity description and technical parameters for performance and capability, number, type, dollar value, and serial number of items. (See paragraph 5 for details of export, including filer identification and shipping reference numbers.)

The following questions are provided as suggested guidance:

--What were the exact United States Munitions List (USML) articles exported to you on September 11th 2008? (Automated Export System (AES) filing data provides the following information, "accelerometer".) Please provide detail on model, type and technical specifications.

--What is the exact end-use for these USML items? Will GDLS be the sole end-user and retain positive control over the accelerometers at all times? Will they be transferred to other end-users in Canada or re-exported?

--Does the company understand the restrictions on USML items, especially the prohibition against unauthorized re-transfer and re-export?

END ACTION.

[¶5](#). Details of the AES filings:

--EXPORT 1 - QUANTITY/COMMODITY:

Quantity not provided

Commodity - Vague description cited as, "accelerometer"

Stated Value: USD 752.00

Export Date - 11 September 2008

ITAR Exemption Number - 126.5B

Filer Identification Number - 540582680

Shipping Reference Number - YTC800909-001

Export Identification Code - 54058268000
